

California AB 1305

December 2025

Green Diamond Resource Company (“Green Diamond”) acknowledges the necessity of transparency, accountability, and public disclosure of information concerning voluntary carbon offset projects. Reliable information on voluntary carbon offset projects is essential to a functional voluntary carbon market that prioritizes quality, integrity, and tangible impacts for ecosystems, communities, and climate. The information about the projects featured on this website also fulfills the disclosure criteria outlined in California’s Voluntary Carbon Market Disclosures bill, AB-1305. The information disclosed here is not sufficiently comprehensive or detailed enough to support use by any company, organization, or other person to form a definitive basis for any business decision, purchase, investment, or contract term. Any investor in a voluntary carbon offset project or purchaser of voluntary carbon offsets from one or more of these projects should approach Green Diamond directly for more detailed information on project diligence or terms of sale for voluntary carbon offsets.

The information contained in these disclosures has been generated internally and/or acquired from sources deemed reliable by Green Diamond. While Green Diamond holds the belief that the information provided herein is accurate, it does not make any explicit or implicit representations regarding its accuracy, adequacy, timeliness, or completeness. Furthermore, Green Diamond does not assume or accept any responsibility, obligation, or liability of any nature concerning this information, and expressly disclaims all warranties, whether express or implied. Green Diamond also disclaims any obligation to update this information except as legally required.

Project details are updated no less than annually.

Any information not listed for a project is not available at this time due to the project’s maturity.

Green Diamond also owns and manages regulatory compliance carbon offset projects with approval and oversight by the California Air Resources Board. Those projects are not disclosed here because they are registered and operated subject to a public process with accountability and reporting that is a matter of public record.

Project: Green Diamond Resource Company Lost Trail IFM

- Registry: ACR
- Protocol: Improved Forest Management (IFM) on Non-Federal U.S. Forestlands, Version 2.1
