RE: Master Inventory Report specific to GDRCO's ownership within South Fork Elk River as per the Monitoring and Reporting Program (Order R1-2012-0088 attachment B II (E)) of Green Diamond Resource Co Forest Management Waste Discharge Requirements (FMWDR) Order R1-2012-0087.

Dear Mr. St. John,

This report contains an updated copy of the **Master Inventory** of all erosion sites located within GDRCo's ownership in the South Fork of Elk River watershed, **2017 Completed Annual Summary Report, and 2018 Planned Annual Work and Treatment Schedule** as defined and set forth under the **Order R1-2012-0087**. The specific provisions are stipulated in Attachment B **Section II (E)** of the Order. **To be submitted by March 31st, of each year.**

Table 1 consists of the updated copy of the master inventory maintained as per the Order and includes the status of the treatment for each site (i.e. completed, to be scheduled, year scheduled for treatment).

RE: 2020 Completed Annual Summary Report for South Fork Elk River Order No. R1-2012-0087

Table 2 contains a summary of road segments that were treated in 2020 by treatment class (upgrading or decommissioning). (Map B)

Table 2: Summary of all Road Work and the Erosion Sites that were completed in 2020

Treatment Year	Treatment Class	Length of Road to Treat (miles)	# of Sites	Volume Saved (yd³)	Treatment Priority¹
2020	New Construction	0.8	8	241	5 Low, 3 Medium
2020	Upgrading				
2020	Decommissioning & Abandonment	0.38	1	0	Medium

1: "Blank" represents sites where no treatment is required.

GDRCO Overview of the completed projects.

Roads:

1-14-119H: Approximately 0.25 miles of temporary road, including road points 324 & 325, were constructed and abandoned in 2020. Approximately 0.13 miles of existing seasonal road was reconstructed and abandoned, including PWA 135 road point.

1-17-116H: Approximately 0.55 miles of temporary road is proposed in units C, E & F as well as approximately 0.25 miles of existing seasonal road to be abandoned. Temporary crossings associated with these units include 8-15. Road Point 5, 23 & 24 were treated concurrently with operations associated with Unit E.

Harvesting:

1-14-119H: Timber harvest operations associated with Unit F were completed in 2020 (33 acres).

1-17-116H: GDRCo completed operations associated with Units C, E & F in 2020. Unit C is approximately 14 acres, including 12.6 acres of clearcut. Unit E is approximately 14 acres, including 12.5 acres of clearcut. Unit F is approximately 35 acres, including 30 acres of clearcut.

Observation: During the winter inspection of all previously treated erosion sites, the RPF did not observe any failed sites.

RE: 2021 Planned Annual Work and Treatment Schedule for South Fork Elk River Order No. R1-2012-0087

This annual work plan is correlated with the Master Treatment Schedule Report and provides the anticipated **2021** schedule to treat sediment sources on GDRCo’s property within South Fork Elk River (**MAP A**).

Summary of the proposed 2021 Treatments

Table 3 contains a summary of road points and ECP points that are planned to be treated in **2021** by treatment class. All sites planned for 2021 in the Master Treatment Schedule Report have been completed in previous years.

1-14-119H: All operations are completed for this THP, none are planned in 2021.

1-17-116H: All operations are completed for this THP, none are planned in 2021.

Other than the two THPs listed above, GDRCo has no active or proposed THPs currently in the South Fork Elk River drainage. No operations are expected by GDRCo in 2021 within this drainage.

Table 3: Summary of the 2021 Planned Annual Work and Treatment Schedule.

Anticipated Treatment Year	Treatment Class	Length of Road to Treat (miles)	# of Sites	Potential Volume Saved (yd³)	Treatment Priority
2021	New Construction (temporary/reconstruction road to be abandoned)				
2021	Upgrading (to be abandoned)				
2021	Decommissioning				

Table 4 contains the detailed information for each sediment source site that is planned for treatment in 2021. No operations are planned in 2021. Table 4 has been included blank for future reporting.

Table 4: Detailed information for each sediment source site planned for treatment in 2021.

Site	THP Site	ECP	Company/THP#	Potential Future Yield (yd ³)	Treatment Priority	Comment on treatment

Table 5 contains a summary of areas that were assessed in 2020 to identify non road-related and non ECP (NRR-NECP) -related erosion sources. The final surveys as per the original Master Treatment Schedule were conducted in 2015. No surveys were conducted in 2020.

Table 5: Summary of areas that were assessed and treated in 2020.

Year	Areas assessed (acres)	Areas to be treated that may contain potential erosion sites (acres)	Erosion Sites found
2020	NA	NA	

Table 6: All areas identified in the original Master Treatment Schedule for SFER that were to be surveyed for non-road related and non ECP (NRR-NECP) related erosion sources have been surveyed. The final surveys were conducted in 2015.

Table 6. Summary of the NRR-NECP areas that will be assessed and treated in 2021.

Year	Areas assessed (acres)	Areas to be treated that may contain potential erosion sites (acres)	Erosion sites found
2021	NA	NA	

Time Schedule for 2021 Treatment Activities for planned ECP sites (See Map A)

All non-THP related sites have been upgraded as per the Master Treatment Schedule, completed in 2015. See below for the remaining THP related sites planned or available to be treated in 2021.

Temporary Road construction: All operations have been completed on 1-14-119H and 1-17-116H. Other than these two THPs, GDRCo has no active or proposed THPs currently in the South Fork Elk River drainage. No operations are expected by GDRCo in 2021 within this drainage. (See Map A 2021).

Road upgrading: All operations have been completed on 1-14-119H and 1-17-116H. Other than these two THPs, GDRCo has no active or proposed THPs currently in the South Fork Elk River drainage. No operations are expected by GDRCo in 2021 within this drainage.

Road decommissioning: All operations have been completed on 1-14-119H and 1-17-116H. Other than these two THPs, GDRCo has no active or proposed THPs currently in the South Fork Elk River drainage. No operations are expected by GDRCo in 2021 within this drainage.

Map A:

All operations have been completed on 1-14-119H and 1-17-116H. Other than these two THPs, GDRCo has no active or proposed THPs currently in the South Fork Elk River drainage. No operations are expected by GDRCo in 2021 within this drainage.

The final areas identified as non-operational areas to be assessed for Non-Road Related and Non-ECP(NRR-NECP) related erosion sites were completed in 2015.

Map B:

Harvest units operated in 2020 are shown in orange and white stripes. Harvest units operated of THP 1-14-119H (Unit F) and 1-17-116H (Units C, E & F) are shown in colored with white stripes based on the year each THP was approved and enrolled into the ECP. These units were assessed for ECP erosion sources during THP preparation. In 1-14-119H, ECP sites were temporary watercourse crossings and were recorded in the THP as ECP points. In 1-17-116H, ECP sites are associated with slides in each unit.

As per South Fork Elk River Management Plan (SFERMP revised 7/26/2012) (D 1 (d)) *“Some roads have been abandoned and are in a condition where “no treatment” would be required because they are completely vegetated, no longer pose a threat to aquatic systems, and are in a condition that would render the disturbance inherent in decommissioning counter-productive. The road assessment process will determine whether treating certain roads or road segments would be counter-productive”.*
